

AUTO MECHANICS

SCHEME OF EXAMINATION

There will be three papers, Papers 1, 2 and 3 all of which must be taken. Papers 1 and 2 shall be a composite paper to be taken at one sitting.

PAPER 1: will consist of forty multiple-choice objective questions all of which are to be answered in 1 hour for 40 marks.

PAPER 2: will consist of five essay questions. Candidates will be required to answer any four questions in 1½ hours for 60 marks.

PAPER 3: will consist of two practical tests both of which must be carried out by candidates in 2 hours for 100 marks.

For the practical test, schools will supply materials needed locally.

EXAMINATION SYLLABUS

S/NO.	TOPIC	THEORY	PRACTICAL
1	WORKSHOP REGULATIONS AND SAFETY	Instructions in basic safety rules relating to personnel, tools, equipment and environment. Types of fire extinguishers. Foam, dry powder, sand, water and wet-blanket types	1.1.1 Identification and use of various safety devices e.g. aprons, goggles, shield, etc. 1.2.1 Demonstration/use fire extinguishers.
2	BASIC TOOLS, INSTRUMENTS AND EQUIPMENT	2.1 Use of basic tools e.g. hand tools and power tools. 2.2 Use of measuring instruments 2.3 Use of basic equipment e.g. jacks, hoist, air-compressors, etc.	2.1.1 Identification and use of basic tools. 2.2.1 Identification and use of measuring instruments. 2.3.1 Identification and use of basic equipment.
3	LAYOUT OF A MOTOR VEHICLE	3.1 Layout of a conventional motor vehicle. 3.2 Functions of the main components. 3.3 Drive arrangements: Front engine rear wheel drive, rear engine rear	3.1.1 Inspection of the layout of a motor vehicle. 3.2.1 Identification of the main components. 3.3.1 Inspection of the drive arrangements.

		wheel drive, front engine front wheel drive, four-wheel drive.	
4	ENGINE (a) Main Components	4.1 Classification of engine (petrol and diesel engine) and their main parts. 4.2 Arrangement and functions of the main components: Cylinder head and cover; cylinder block, crankshaft, flywheel, connecting rod, piston and rings, spark plug (petrol) fuel injection pump and injector (diesel), valve, valve springs, oil seal, cam-shaft, push rod, rocker shaft/arms. 4.3 Two stroke and four stroke cycle petrol and diesel engine. 4.4 Advantages and disadvantages of petrol and diesel engines. 4.5 Single and multi-cylinder engines.	4.2.1 Identification of main components. 4.2.2 Decarbonization of cylinder head.
	(b) Principles of operation.		4.3.1 Identification of two and four stroke engines.
	(c) Types of engine		
	(d) Crank arrangement and firing order.		4.5.1 Inspection and classification of engines according to cylinders. 4.5.2 Compression test. 4.5.3 Measurement of the bore and crank-journals for wear.
	(e) Valve-operating mechanism	4.6 Crank arrangement and firing orders: 2, 4 and 6 cylinder in-line engines. V-4, V-6 and 4-cylinder horizontally-opposed engines. 4.7 Functions and operation of valve operating mechanisms. Drives layout, main components, 4-cylinder 12 – and 16 - valve	4.6.1 Determination of firing order through valve opening. 4.6.2 Fault diagnosis. 4.7.1 Identification of main components. 4.7.2 Valve adjustments. 4.7.3 Fault diagnosis.

		engine. Valve timing including calculation of valve opening and closing periods.	
5	FUEL SUPPLY SYSTEMS	<p>5.1 Fuels and combustion: elements of combustion; air-fuel ratios; types and properties of fuel-petrol and diesel.</p> <p>5.2 Petrol: Layout and operation of petrol supply system-gravity and force-feed systems: simple carburetor, multi-jet carburetor. Air filters/cleaners. Mechanical and electrical fuel pumps. Advantages and disadvantages.</p> <p>5.3 Petrol-injection system: Merits and demerits. Electronic Fuel (Petrol) injection (EFI).</p> <p>5.4 Diesel: Layout of a diesel supply system: elementary treatment of injection pumps and injectors. Cold starting devices.</p>	<p>5.1.1 Checking fuel system troubles.</p> <p>5.1.2 Inspection of exhaust gases for normal air-fuel ratios and excessively worn engine.</p> <p>5.2.1 Inspection layout of petrol supply system: dismantling, examination and reassembling of a mechanical fuel pump.</p> <p>5.2.2 Fault diagnosis.</p> <p>5.2.3 Dismantling, inspection and reassembling of a carburetors.</p> <p>5:3:1 Identify the main components</p> <p>5.4.1 Inspection of various types of injection pumps, servicing of injectors and bleeding.</p>
6	EXHAUST SYSTEM	61 Purpose and layout of the system. Types of silencers and manifolds.	<p>6.1.1 Inspection of exhaust system and identification of the exhaust and inlet manifolds.</p> <p>6.1.2 Checking the system for leakage.</p>
7	LUBRICATION	<p>7.1 Engine Lubrication: Reasons for lubrication and types: boundary layer and film lubrication. Lubricated parts and components.</p> <p>7.2 Types of feed-splash,</p>	<p>7.1.1 Identification of main components.</p> <p>7..2.1 Changing of oil and oil filters.</p> <p>7.2.2. Servicing and testing of</p>

		<p>calculations.</p> <p>9.3 Introduction to automatic transmission. Functions of torque converter and fluid flywheel.</p> <p>9.4 Types, layout and operating principles of sliding-mesh, constant mesh and synchromesh gearboxes; main components and their functions. Gear selector mechanism; simple calculations of gear ratios.</p> <p>9.5 Functions and types of the propeller shaft, universal joint and sliding joint.</p> <p>9.6 Purpose of rear axle. Arrangement and functions of main components: final drive, differential unit, half-shaft, oil seal and hub bearings.</p> <p>9.7 Methods of supporting axle shafts. Advantages and disadvantages</p>	<p>9.2.2 Fault diagnosis.</p> <p>9.4.1 Identification of components of a gearbox.</p> <p>9.4.2 Inspection of gear teeth for wear.</p> <p>9.4.3 Fault diagnosis.</p> <p>9.5.1 Examination of the propeller shaft and universal joint bearings for bow and wear respectively.</p> <p>9.6.1 Identification of main components.</p> <p>9.6.2 Fault diagnosis.</p> <p>9.7.1 Identifying main components.</p>
	<p>(c) Gearbox</p> <p>(d) Propeller shaft and universal joint.</p> <p>(e) Rear Axle</p>		
10	WHEELS AND TYRES	<p>10.1 Types of wheel rims: pressed steel, disc and wire spoke wheels. Hub attachments. Wheel balancing. Tyre sizes and markings.</p> <p>10.2 Tyres: tubed and tubeless types: Advantages and disadvantages.</p> <p>10.3 Wheel balancing, tyre sizes, markings.</p>	<p>10.1.1 Checking and adjustment of wheel bearing clearance, removal and changing of road wheels.</p> <p>10.2.1 Tyre fitting and checking tyre pressure.</p> <p>10.2.2 Tube and tyre patching.</p> <p>10.3.1 Wheel balancing.</p>
11	BRAKING SYSTEM	<p>11.1 Layout, functions and operation of braking system, drum and disc,</p>	<p>11.1.1 Inspection of different types of brakes. Replacement of pads and</p>

		<p>mechanical and hydraulic. Brake lining materials and methods of attachment.</p> <p>Importance of servo-assisted brake.</p> <p>Advantages and disadvantage of disc and drum brakes.</p> <p>11.2 Brake fault.</p>	<p>shoes, bleeding and adjustment. “Spot testing brakes.</p> <p>11.2.1 Fault diagnosis.</p>
12	STEERING SYSTEM	<p>12.1 General layout and functions of the front axle and steering systems.</p> <p>12.2 Steering geometry. Ackerman linkage, castor, camber, king pin inclination, toe-in and toe-out. Types of steering gearboxes-rack and pinion, recirculating balls only.</p> <p>12.3 Steering faults</p>	<p>12.1.1 Identification of main components of different layout.</p> <p>12.2.1 Front wheel alignment, inspection of tyre wear patterns.</p> <p>12.3.1 Fault diagnosis.</p>
13	SUSPENSION SYSTEM	<p>13.1 Purpose of the suspension system, layout and types, rigid beam and independent. Suspension (semi-elliptic and coil springs); advantages and disadvantages, dampers (shock absorbers.)</p>	<p>13.1.1 Identification of differences between the rigid beam and independent suspension.</p> <p>13.1.2 Fault diagnosis.</p>
14	<p>ELECTRICAL SYSTEMS</p> <p>(a) Fundamentals</p> <p>(b) Auto Wiring system</p>	<p>14.1 Basic electrical terms and symbols. A.C and D.C sources, simple circuits, Ohm’s law and calculations involving series and parallel circuits. Basic components and their functions-relays, resistors, lamps, fuses and switches.</p> <p>14.2 Wire gauges, colour coding – reasons for their use. Wiring system – earth and insulated returns: ways of joining cables-jointing, terminals, connectors and soldering.</p> <p>14.3 Purpose, construction</p>	<p>14.1.1 Setting up simple electrical circuits, use of simple electrical measuring instruments.</p> <p>14.2.1 Inspection and identification of various components. Simple soldering and joining of cables.</p>

	(c) Battery	and testing of lead-acid battery. Electrolyte composition. Battery care and maintenance.	14.3.1	Examination and testing of lead-acid battery. Preparation of electrolyte.
	(d) Ignition System	14.4 Layout of the coil ignition system. Function and operation of the main components. Introduction to computerized ignition system.	14.4.1	Identification of main components; ignition timing, setting of contact breaker points and spark plug gaps.
	(e) Starting System	14.5 Layout and functions of the main components. Types of starter motor.	14.5.1	Inspection and identification of main components.
	(f) Charging System	14.6 Purpose and layout (dynamo and alternator). Main components and their operation. Comparison of d.c and a.c generators.	14.6.1	identification of the component parts.
	(g) Lighting System	14.7 Layout of the system main components and their functions. Fuses and bulbs-types and ratings.	14.7.1	Identification of main components, inspection and replacement of bulbs and fuses.
	(h) Auxiliary Unit	14.8 Layout and operations of the auxiliary units. Instrument panel, horn, windscreen wiper.	14.7.2	Head lamp focusing.
		14.9 Electrical faults.	14.8.1	Inspection and testing of main components.
			14.9.1.	Fault diagnosis.
15	ELECTRONICS (a) Fundamentals of Electronics.	15.1 Explanation of the term Auto Electronics. Identification of electronic components: diodes, transistors, resistors, capacitors, LED, transducers, coil and motors. Functions of components. Symbols	15.1	Identification of components.

	(b) Electronic Ignition	15.2	in a circuit. Operation of transistorized ignition system. Types of transistorized and electronic ignition system: Inductive and hall effect. Merits and demerits.	
	(c) Electronic Fuel Injection	15.3	Purpose and type of systems (single-point and multi-point injections).	15.3.1 Identification of components in systems (single-point and multi-point).
16	AUTO AIR-CONDITIONING	16.1	Purpose, layout and identification of major components (compressor, condenser, evaporator and dryer). Principles of operation.	16.1.1 Inspection and identification of conditioning system and the components.
17	SAFE MOTORING	17.1	Main causes of accident, essentials of safe driving and application of highway code and safety devices.	17.1.1 Identification of faults and defective components that could cause accidents. Identification and interpretation of road signs.

RECOMMENDED READING LIST

1. Technology for Motor Mechanics Volumes 1 – 4 by S. C. Mudd (Edward Arnold Publishers).
2. Vehicle and Engine Technology by Heinz Heister
3. Motor Vehicle Technology and Practical Work by J. A. Dolan
4. Fundamentals of Motor Vehicle Technology by Hillier and Pittuck (4th Edition)
5. Automobile Engine and Vehicle Technology by Ian Chisholm
6. Motor Vehicle Technology (Books I and II) by R. W. Bent
7. Motor Vehicle Mechanic's Textbook by E. K. Sulley (New Edition)
8. Highway Code
9. Motor Vehicle Technology for Mechanics by P. P. J Read and V. C. Reid.
